BIOE 565 or 580 or 603		BIOE 565 or 580 or 603	BIOE 565 or 580 or 603
BIOE 996 Final Project			BIOE 996 Final Project
ELECTIVES		ELECTIVES	ELECTIVES
NURS 525 (<i>as HLMP elective</i>)		NURS 525 (<i>as HLMP elective</i>)	NURS 525 (<i>as HLMP elective</i>)
NURS XXX		NURS XXX	
BIOE XXX			BIOE XXX
BIOE XXX		BIOE XXX	BIOE XXX

BIOE XXX courses are student-chosen electives.

BIOE996 is a final project/research course, resulting in a scholarly paper. Students are responsible for arranging their final project advisor and working with him/her to design an appropriate project. All projects must be approved by the Graduate Director of the MBE program.

Descriptions for Nursing Courses

NURS748 - Leadership Development for Health

This course will provide the conceptual and theoretical framework for examining the concept of leadership within the contexts of health systems, health professionals and health policy. It will focus on characteristics of personal and professional leadership, change theory, and the application of critical thinking to the analysis of work environments, systems and the politics of health.

NURS749 - History, Health and Social Policy

This course explores the impact of historical ideas, events, and actors on current issues in health and illness care. Topics include the movement from hospitals to health care systems; the changing definitions of professionalism and professional practice patterns; and the ways historical context shapes definitions of leadership roles and theoretical knowledge.

NURS540 - Current Issues In Health and Social Policy

Analysis of key contemporary issues in health and social policy that will provide students with a deeper understanding of the design and structure of the U.S. health care system, the policy initiatives that have shaped it, and the roles of the government, the private sector, and consumers and advocacy groups in setting the policy agenda. Seminars will examine the origins of each issue, the policies enacted and their effects, both intended and unintended, and will propose and debate the merits of alternative policy solutions. The role of health services and policy research in informing the policy debate and directions will be highlighted.

ELEC003 - Advanced Theoretical Foundations Course

These course units are individually designed with support and guidance by designated faculty scholars in the student's area of interest or specialty.
